INLP Analysis of "The Exorcist" Series

Reviews

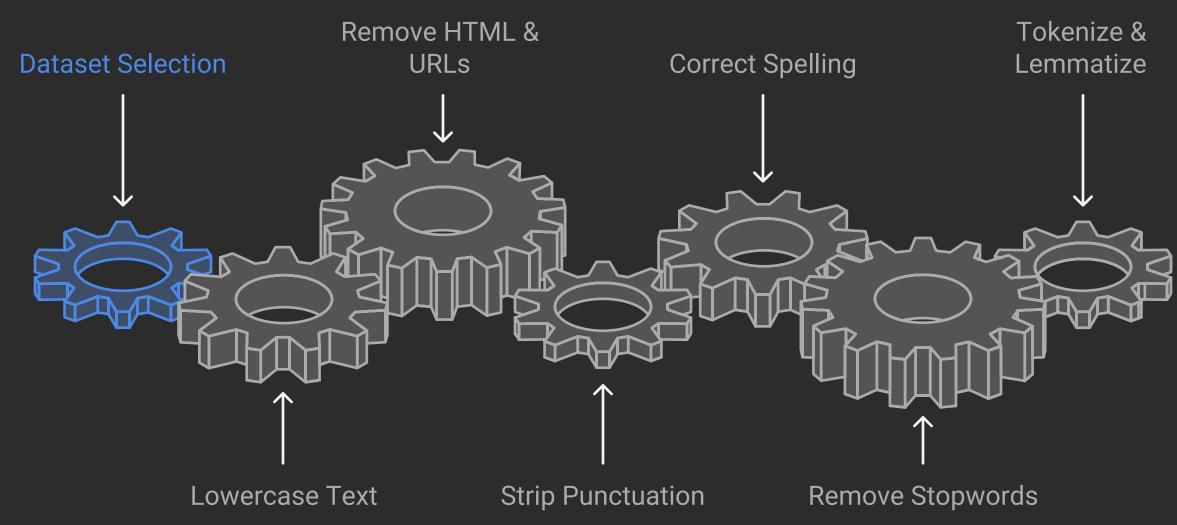

1. Start: The Project Goal 🎯

NLP Analysis of "The Exorcist" Reviews

2. Part 1: Dataset & Preprocessing

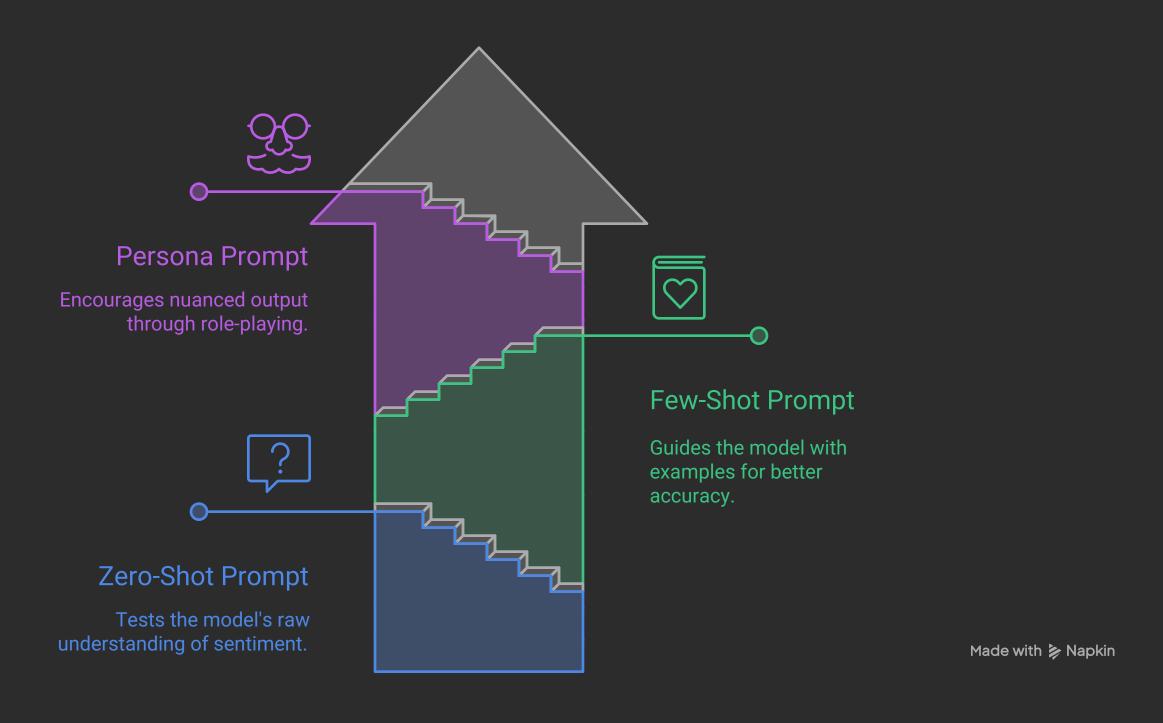

Data Preprocessing Pipeline

Made with 🥻 Napkin

3. Part 2: Prompt Engineering with LangChain 🖟 👭

Sentiment Analysis with LLM

4. Part 3 & 4: Evaluation & Troubleshooting

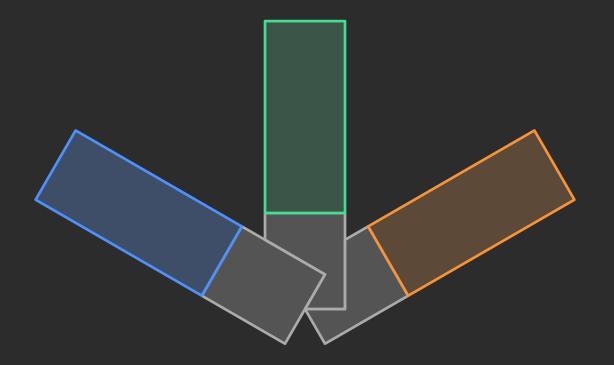

How to evaluate the project's success and address potential issues?

Quantitative Analysis

Offers precise metrics like accuracy and recall but requires more resources.

Qualitative Analysis

Provides rich, descriptive outputs but may lack precision.

Address Model Bias

Ensures fairness and balance in model outputs through data auditing and augmentation.
